Abhishek Kumbhare

Mobile: **+91-:9767079693**

Sr.Software Engineer

Email:abhishekparate7@gmail.com

Website: https://abhi-tech.in/

Summary:

4+ years experienced web and application development professional with a demonstrating capability in designing & maintaining software and website, cloud based servers, etc. Proficient in understanding clients' requirements while monitoring timely delivery to ensure maximum client satisfaction.

Professional Experience:

- Around 4.5 years of experience in Analysis, Design, Development, Deployment, Management and validation of Various stand alone and client server applications.
- Good understanding on Django **ORM** and Django **DRF**.
- Experienced in interfacing with third party API's using REST .
- Worked with varieties of Relational Databases (RDBMS) like SQLite, MySQL and PostgreSQL.
- Working experience with cloud infrastructure of **AWS** (Amazon Web Services)
- Good Knowledge on Linux and **Shell Scripting**.
- Knowledge of Sub versioning Tool **GIT**.
- Self-motivated team player with good Analytical, Logical and Problem-Solving Ability.
- Well versed in design and development of presentation layer for web applications using technologies like HTML, CSS, JavaScript, JQuery, AJAX and Bootstrap.
- Experience in using **Apache** and **Nginx** web servers for deployments and hosting.

Professional Experience:

Sr. Software Engineer at **Trigensoft Solutions Pvt Ltd from May 2017 to till present**

Technical Skills:

Programming Languages	:	Python, PHP,YAML
Framework	:	Django, CodeIgniter
Web Design	:	HTML5, CSS3 , Jquery, AJAX, Bootstrap
Database	:	MySQL, SQLite, PostgreSQL
Cloud Platform	:	AWS
Web server	:	Apache, Nginx, Gunicorn, Uvicorn, Daphne
Operating System	:	Windows, Linux, SSH
Other	:	Bitbucket, Github, Git Commands

Projects:

Project 1

Project Title : Techconnectr
Team Size : 5 Members
Role : Sr. Software Developer
Database : PostgreSQL

Environment:

Python3.8, Django, Linux, HTML, CSS, AJAX, Jquery, Bootstraps
Media / Assets files: AWS (S3)

Project Description:

Techconnectr is a multi-vendor, lead generation web application. Here, the client can create a campaign(s) for lead generation based on specific requirements. Multiple vendors will provide leads for the same which will be validated through Techconnectr's lead verification engine.

Responsibilities:

- ✓ Implemented Django, rest framework
- ✓ Managing design, coding, delivery and implementations.
- ✓ Code reviewing, root cause analysis and helping to the other resources technically.
- ✓ Involved in Client interaction on regular basis to understand the Business of the Client
- ✓ Taken care all code is deploying with high quality standards.
- ✓ Developed service layer, process layer and Integration layer in provider side.
- ✓ Played major role developing and operational activities

Third Party API's Integrate:

- **Marketo**
- **Eloqua**
- **Hubspot**
- **SelectHub**

Project 2

Project Title : MILIT : Question Paper System
Team Size : 4 Members
Role : Sr. Software Developer
Database : PostgreSQL

Project Description:

This is stand alone application , It is running local LAN Network, in this application teachers(user type) upload subject related question into system , that accordingly HOD(user type) will approve / rejected that question then , After that COE(user type) will create question paper, system is providing 2 way of creation question paper 1. Manually 2.Automatics. That paper goes to CI (user type) for approval.

Environment:

Python3.8, Django , Linux, HTML, CSS, AJAX, Jquery, Bootstraps.
PIP Packages: **django-background-tasks**

Responsibilities:

- ✓ Implemented Django
- ✓ Managing design, coding, delivery and implementations.
- ✓ Code reviewing, root cause analysis and helping to the other resources technically.
- ✓ Involved in Client interaction on regular basis to understand the Business of the Client
- ✓ Taken care all code is deploying(offline) on client Environment.
- ✓ Played major role developing and operational activities

Project 3

Project Title : GoShopRx
Team Size : 4 Members
Role : Sr. Software Developer
Database : PostgreSQL

Project Description:

In this application have 3 kind of user 1.patient 2.pharmacy 3.Physician . patient creates order about drugs(medicines) , also there is 2 type of drugs 1.controlled 2.uncontrolled , if patient make order any uncontrolled then he has get approval from physician then pharmacy will approve orders.

Environment:

Python3.8, Django , REST API's , Linux, HTML, CSS, AJAX, Jquery, Bootstraps.
PIP Packages: **django-background-tasks**
Payment Gateway : **Payflow**

Responsibilities:

- ✓ Implemented Django
- ✓ Design System, Database, Manage coding, delivery and implementations.
- ✓ Code reviewing, root cause analysis and helping to the other resources technically.
- ✓ Involved in Client interaction on regular basis to understand the Business of the Client
- ✓ Taken care all code is deploying on AWS.
- ✓ Played major role developing and operational activities .
- ✓ Involved in Client interaction on regular basis to understand the requirement /changes of the Client.

Project 4

Project Title : Hedo
Team Size : 4 Members
Role : Software Developer
Database : PostgreSQL

Project Description:

Hedo is platform where one user(publisher) starts stream to multiple user ,users can chat with publisher while streaming, it's like online class.

Environment:

Python3.8, Django, REST API's , Linux, HTML, CSS, AJAX, Jquery, Bootstraps.
Third Party Packages: **Red5Pro**
Payment Gateway: **CashFree**
Media / Assets files: **AWS (S3)**
Offline Video Stream: **AWS(cloudFront)**

Responsibilities:

- ✓ Implemented Django, DRF.
- ✓ Design System, Database, Manage coding, delivery and implementations.
- ✓ Code reviewing, root cause analysis and helping to the other resources technically.
- ✓ Taken care all code is deploying on AWS.
- ✓ Played major role developing and operational activities.
- ✓ Responsible for coding and developing using Django.

Project 5

Project Title : NSE
Team Size : 4 Members
Role : Software Developer
Database : PostgreSQL

Project Description:

This is Crepto Algo-Trading system. Where we have few algos and these algo run a specific market scenario, automatically action will done like sale & buy when that condition/ scenario match with algos.

Environment:

Python3.8, Django, REST API's , Linux, HTML, CSS, AJAX, Jquery, Bootstraps.
Pip Packages: **Pthon-binance, django-background-tasks, channels**

Responsibilities:

- ✓ Implemented Django,
- ✓ Design System, Database, Manage coding.
- ✓ Played major role developing and operational activities.
- ✓ Responsible for coding and developing using Django.
- ✓ Involved in Client interaction on regular basis to understand the requirement /changes of the Client.

Academic Details:

Degree/Course	**University**	**Tenure**
MCA	Pune University	2015 - 2018
BCA	Gujarat University	2012 - 2015
HSC	Gujarat Board	2010 - 2012
SSC	Gujarat Board	2009 - 2010
